The pictures - some fine Murillos. The old men's words were magnificent, as the sister said. Next we went up the Giralda - the old Moorish tower of the Cathedral - with inclined planes, & steps at the top. Fine view. Then we drove through the Park, & the length of the fashionable drive. The crowd of carriages was great. Each handsome one - & our cabby was a little more than usual - but I enjoyed it. Rope from

Fri. Nov. 2. ^{the top of the} Giralda.

An early start, & a wretched guide. First the Cathedral - pictures, chapels, silver statues, etc. Fortunately got in behind the fence where the Coos repairs are going on. Most interesting. Then to the Alcazar, & I could not have imagined anything more beautiful than this old Moorish palace, where the sovereigns of Spain have lived since they conquered the Moors. The finest work - the most exquisite coloring - the dainty arches & columns, all so lovely. Beautiful gardens & the bath of Maria de Padilla, wife of Peter the Cruel. Such wonderful tiles as Seville has! In the Court of the University, I counted 25 different kinds, & there were many more.

This spring of smut myrtle from the Alcazar. We bought a little picture, too. The tobacco factory

was interesting. About 2000 women - most
of them young - many with babies in wooden
cradles, beside them, smoked at cigarettes.
All looked neat + happy, with blossoms in their
hair. They were all the different types of
Spain. Many more were at work on ci-
gares - + old women - busy at cooking the beans.
Saw towers + gates (Moorish) of many churches -
+ then to the Cathedral + see it by the setting
sun. Murillo's finest picture - St. Antony Vision
(Padua). The figure of the monk had been cut
out + taken to America - but was got back for
much money. Colors of midday fine. - Suelto's
head quarters. Very tired.

Exi Sat. Nov. 3.

Have had a lovely, restful day.
Let the rest of the party go on, + we
took our time this a.m. - strolled
around the Cathedral - went to a few
places in it, + what a noise the monks
made! Went to the library of Columbus -
saw the bridle of the Cid's horse - etc.
Took plenty of time in the Alcazar,
+ look around to my heart's content.
After lunch, wrote letters, then went thru
the queer, narrow shopping street. Now
we are going to the theatre - that is
the Spanish dances, given for tourists.

Sun. Nov. 4. Malaga.

The Spanish dances, held in a queer old hall, were quite pretty - not as much so as those at Sorrento. The handkerchief act - our first experience with it. Such a queer old woman danced such a queer dance, & an old man threw her handkerchief back at her. Up early - started from Seville at 8:15. A long tedious day - not many miles, but many stops. Scenery not like any thing I have seen. Whole families picking olives - as many as 25 - teams of donkeys or oxen plowing - one after the other. All houses & towns whitewashed. Arr. here

Mon. Nov. 5.

Look things very easy this a.m. Only went for a little walk along the Alameda & Harbour. An awfully dirty town - but fine grapes. After lunch, with carriage & guide, went to his private villas, & saw their beautiful grounds. Very tropical. Lots of Royal Palms. All our Florida plants.

Drove along the dried up river Guadal

the old Roman walls, + home. Then on

combination of Mammikens.

Tues. Nov. 6. Ronda.

Took a drive outside Malaga, to see
raisins made. 36 hours in the sun.
All the picking, + sorting + clipping + pack-
ing done by Spaniards (men). The lovely
raisins did not look so appetizing
afterward. A lovely view of Malaga,
with the Gibralfaro, the Calvary + the
cathedral. Streets + roads something
fearful. Forged the Guadalupe

Miserable "coffee" - Spanish bread, which I am getting to like - dirty waiter. Then we started with a nice guide to see Ronda. Went first to the Alameda, & looked 800 ft. down into the Gorge of the Guadalevin, a tiny river which runs electric light, & many flour mills. A fine view. Then to the Bull Ring, which was formerly a Roman Amphitheatre. This floor from the Bull Ring. Saw the cages for the bulls. The spears, wooden, iron leggings, fancy bandoleros, etc. always ready for a fight. Then we tramped over miles of street, no side walk, & every step a penitential "Kelyrimage". Then climbed all the 800 ft. up again. A fine view of the New Bridge, with its 4 carious arches, + prison. Can easily drive - drove by moonlight through the queer town - train late. A ride of three hours thro' pretty country, almost as light as day, + a delightful rail across the bay of Algeciras, with the great Rock of Gibraltar before us, thousands of lights sparkling at its foot, + many vessels in the harbor. A bright, cheery entrance to the

Took things, Strolled along Waterport street. bought some lovely Malta lace - saw some Tunisians, with bare legs. After lunch bought a beauty piece of embroidery for the Ladies. Walked in the Alameda with its fine poinsettias - + along the Harbour - + out the Southport Gate. Then we took a drive in a queer little wagon with cloth curtains. out the Waterport Gate, over the Inundation to the Neutral Ground, with its Eng. guard on one side, + Spanish on the other. There are soldiers

Every where - Cameron Highlanders - Monkey
Cape - red coats, & fine large men they
look, after the Spaniards. At 5:30 the
gun fired, & "St. Peter" marched past,
with his key in his hand, preceded by a
bagpipe band & great drums, & guarded
by three soldiers, to shut & lock the gates
for the night. The street was a jam of
people & wagons, trying to get in & out, in
time. At 11:00 Spaniards come to work on the
harbour: & go out at night. Three U.S. war
vessels here.

Fri. Nov. 9.

This a.m. drove to Europa Point, & watch-
ed the men fire at target. A lovely drive
along the sea. After lunch went up to the
Galleries, made in the rock. A fine view.
While waiting for our turn, watched the
soldiers play foot ball. Met Capt. Chester of
the Kentucky - our nemat & finest battle ship,
now in the harbour. Also a couple of Annapo-
lis graduates. Quite pleasant. Drove
around to Catalans, a tiny fishing village
on the beach, under the Rock. Then along
the Neutral ground - & met St. Peter; follow-
ed him up to the Gov.'s house to deliver the
Key. This floor from Gibraltar.
Heard the military band at

A lovely sail of 3 1/2 hrs. brought us into the Bay of Tangier, having passed thro' the Pillars of Hercules. Small boats manned by Moors came out for us, & on more come on shore, among the white, pink, blue & yellow houses. There are no sidewalks, & many hills, but it is not as bad as Ronda. Arr at

Sun. Nov. 11.

The man called to pray-

nearly all night long, but
it sounded very sweet & musical. Have
been out all day on mule back, & I'm
sure there is not a nook nor corner of this
place & surroundings that you have not ex-
plored. Such very narrow streets - not more
than five feet wide where the Consulate is.
Nothing would tempt me to live here. Went to
the Great Market several times. Nothing
compared with those we saw in Egypt.
Two wedding processions have gone by, the
bride in a box on a donkey, preceded & follow-
ed by lighted candles, & sort of tom tom music.
The Muizzin called for prayer nearly all night
but I like it.

Mon. Nov. 12 - Gibraltar

Had a quiet, pleasant a. m. in Tangier,
watching the sights. Left at 1 - Pleasant sail,
a very rough landing. Indeed, it seemed
quite terrible as long as we stayed by the
steamer, the waves high, & so many other
boats bobbing around. Saw St. Peter. It had

like to take one home. Many Amer-

child, covered with flowers & mosquito netting,
in a plain wooden box, carried thro' the
street by four men - & before they laid the
lid on, they took a mouth of artificial flowers
off the head, & the netting. A man took the

The Prayer Niche has beautiful mosaics, &
the ceiling is a single piece of marble, made

of the columns, & are "excavating" that is,
pulling down chapels, & roof, & finding many
parts of the old Moorish Mosque. This leaf

Had such a splendid sleep last night! I was like a log, & never awoke till 9. Mr. had the fire going & I had my coffee in bed, & had such a good rest. After lunch strolled around the town & bought a fine collar for Abdul-Hassan. Now we are going to take the night train for Barcelona.

Fri. Nov. 23 - Barcelona

Had a very comfortable night in the sleeper. Arr. at Barcelona at 9 a.m. Everything seemed very busy, & we passed the fine monument to "Christopher Colon" on the way & the

We started out at once. Our room looks on the Rambla, & we walked the length of this. There was a great crowd it being the favorite promenade - a wide, well paved walk, over the river. Two rows of plane trees on either side, & lined with flower stands, & birds & cages. I bought a tube rose, but not because I am a Carlist. After lunch we drove in the park, & thro' the main streets - along the Harbour & went to the Cathedral. This is the darkest one I have ever been in. A very curious figure of Christ is in the main chapel - the top of the body was black - a black skirt - white legs. Said to have been carried in the Battle of Lepanto. Have been looking in the shops. Many very stores.
